Subject: 12th Mediterranean Offshore Conference & Exhibition (MOC 2026)

Dear Dr. Abeer,

With reference to your esteemed letter regarding the participation of the SPE Egypt Section as a Strategic Technical Partner in the 12th Mediterranean Offshore Conference & Exhibition (MOC 2026), we would like to express our sincere appreciation to the Ministry of Petroleum and Mineral Resources and the MOC Organizing Committee for this valued invitation and for the continued confidence placed in the SPE community.

The SPE Egypt Section highly values MOC as one of the region's leading energy events and remains committed to supporting initiatives that enhance the technical quality of the conference, promote knowledge exchange, and strengthen the international visibility of Egypt's oil and gas sector.

In support of the MOC 2026 technical activities, we suggest the following nominations based on the individuals' technical expertise, professional standing, and previous contributions to technical activities, conferences, paper reviews, and knowledge-sharing initiatives.:

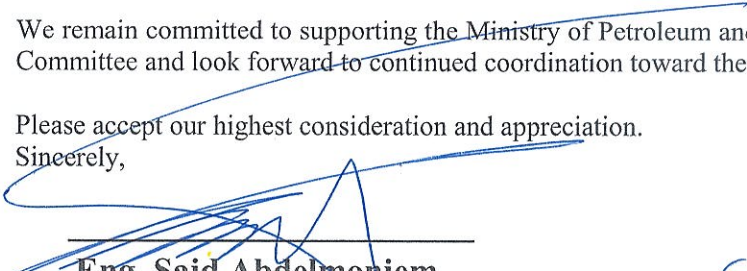

1. Dr. Ahmed El-Banbi : ahmed.elbanbi@aucegypt.edu
2. Dr. Mostafa Seleem: mostafaahmed.seleem@bakerhughes.com
3. Eng. Ahmed Sabaa: Ahmed.Sabaa@agiba.com
4. Eng. Hamed Abdel Moneim: hamedms@egpc.com.eg
5. Chem. Marwa Alqutt: Marwa.Alqutt@agiba.com

The nominated professionals would participate in MOC 2026 in their individual technical and professional capacities, based on the nomination of the SPE Egypt Section. Their participation would not represent formal involvement by SPE International. Any potential involvement of SPE International may be considered separately through direct coordination with SPE International.

We also acknowledge the successful collaboration during MOC 2024, which included the involvement of SPE International and the publication of the accepted technical papers through SPEi's technical platform. This cooperation contributed to the international visibility and lasting technical value of the conference proceedings. The SPE Egypt Section would be pleased to support any future opportunities for cooperation between MOC and SPE International.

We remain committed to supporting the Ministry of Petroleum and Mineral Resources and the MOC Organizing Committee and look forward to continued coordination toward the successful delivery of MOC 2026.

Please accept our highest consideration and appreciation.
Sincerely,

Eng. Said Abdelmoniem

SPE Egypt Section Chairperson
